DETAILED ACTION

This first Office Action is in response to Applicant's originally filed application of December 6, 2001 in this case.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Steffen (4,037,527) in view of Joy (3,785,271). Steffen teaches, substantially, each feature of the claimed invention as shown in the attached red marked up copy of Steffen's Figure 3. Steffen, however, does not teach an opening in the wall. Joy teaches an opening in the wall as shown in the attached red marked up copy of Joy's Figure 4. It would have been obvious to one of ordinary skill in the art at the time of invention to have made an opening in Steffen's wall in order to pass, for example, electrical wires for supplying a socket with electricity for use in Steffen's bin (10) as taught by Joy. Regarding claim 4, it is well known to provide slots in place of holes for flexibility of fastening of flanges.

Art Unit: 3632

Prior Pertinent Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent No. '490 to Kallestad et al.; '403 to Hansen; and '445 to Steffen. The above references each teach ventilation systems having flange mounted ventilation fan structures.
